

Utilizing GIS to Connect HPI Data with Overdoses in Riverside County

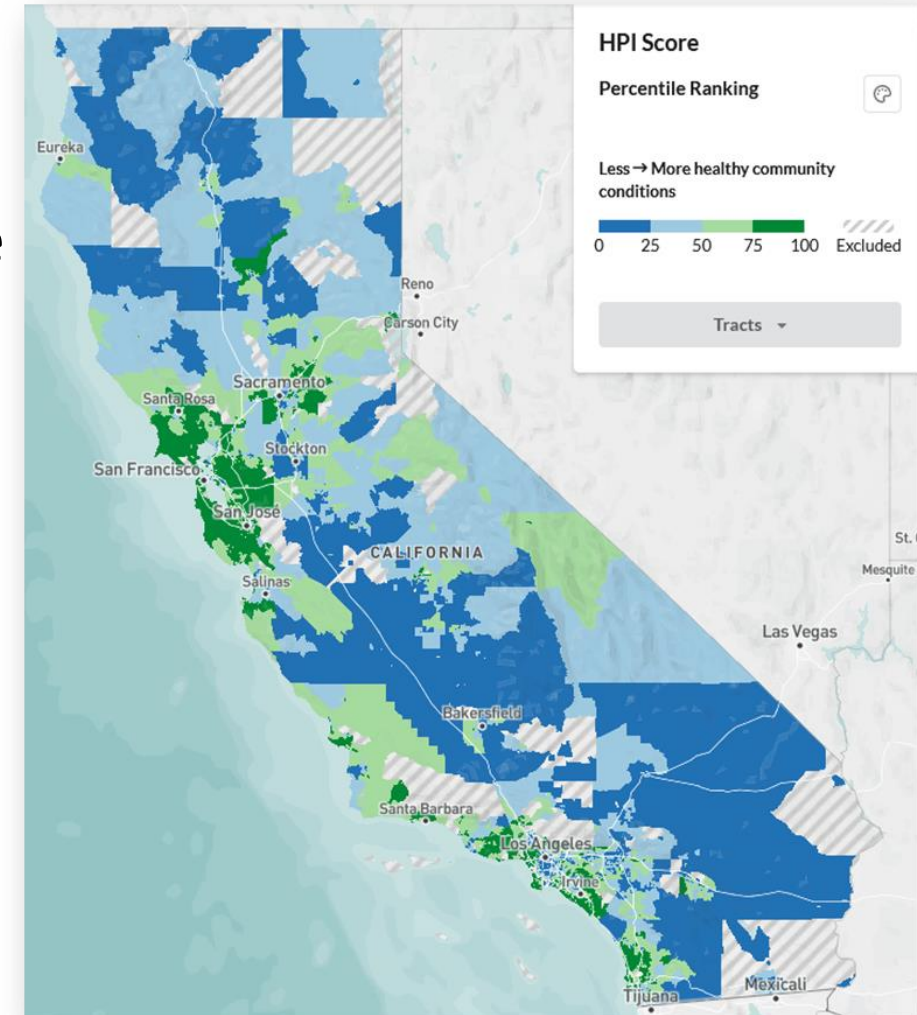

RUHS-Public Health

Riverside County Overdose Data to Action (RODA)

Epidemiology & Program Evaluation

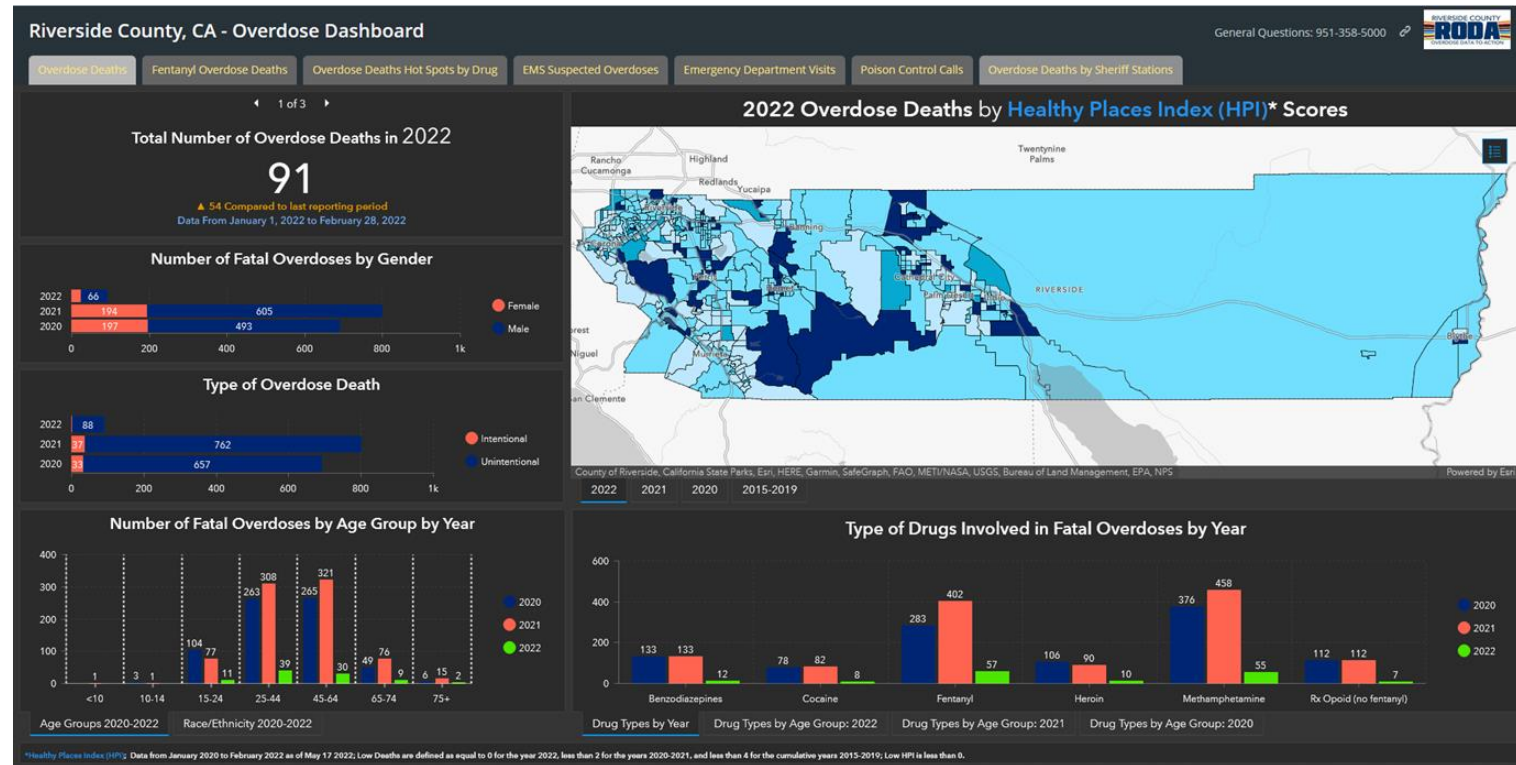

Healthy Places Index (HPI)

- The California Healthy Places Index summarizes the healthiness of community conditions of California census tracts based on the distribution of 25 indicators of social determinants of health
- The 25 social drivers of health fall under eight policy action areas:
 - Economic
 - Social
 - Education
 - Transportation
 - Neighborhood
 - Housing
 - Clean Environment
 - Healthcare Access
- “Ranking” of conditions compared to other neighborhoods
- Compare the health and well-being of communities at the neighborhood level

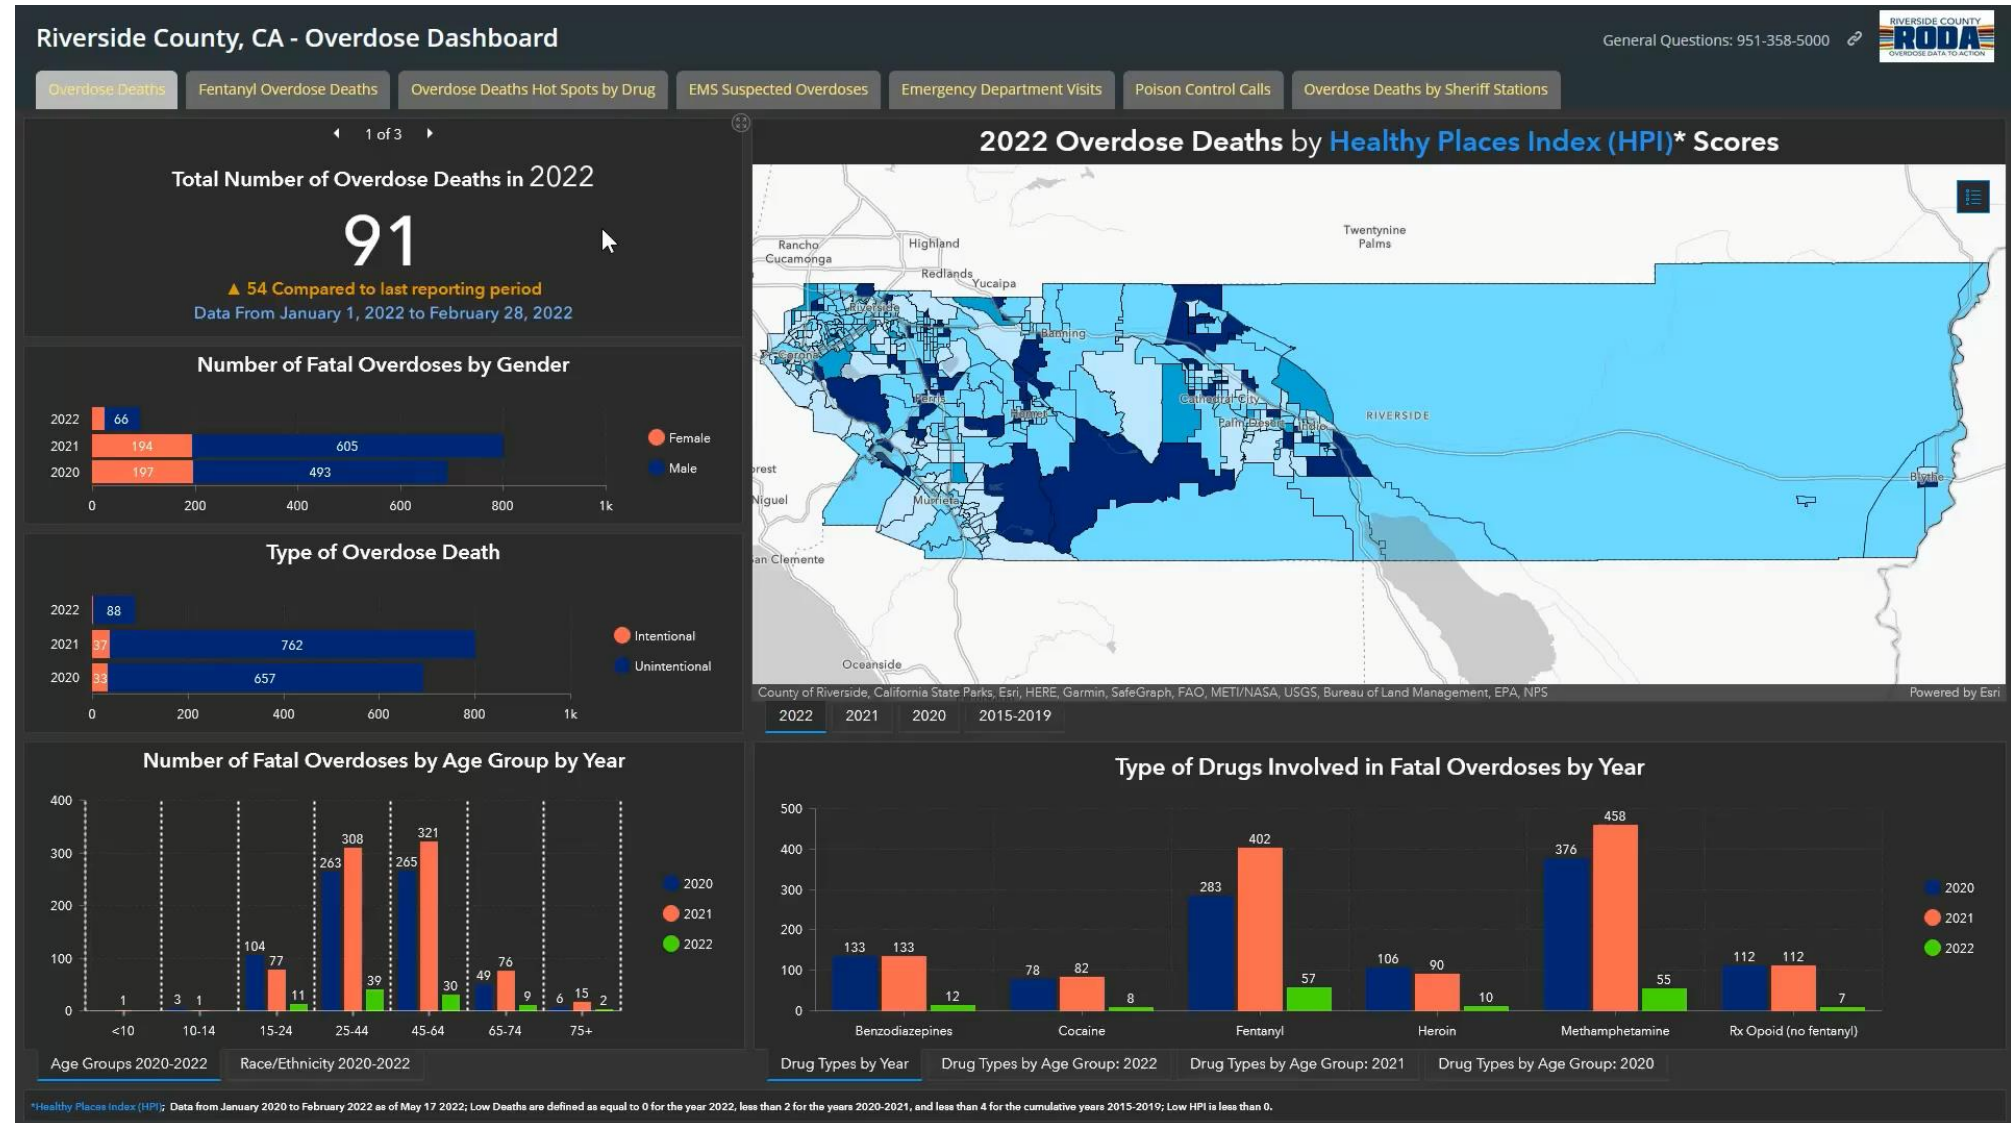

Dashboard Development

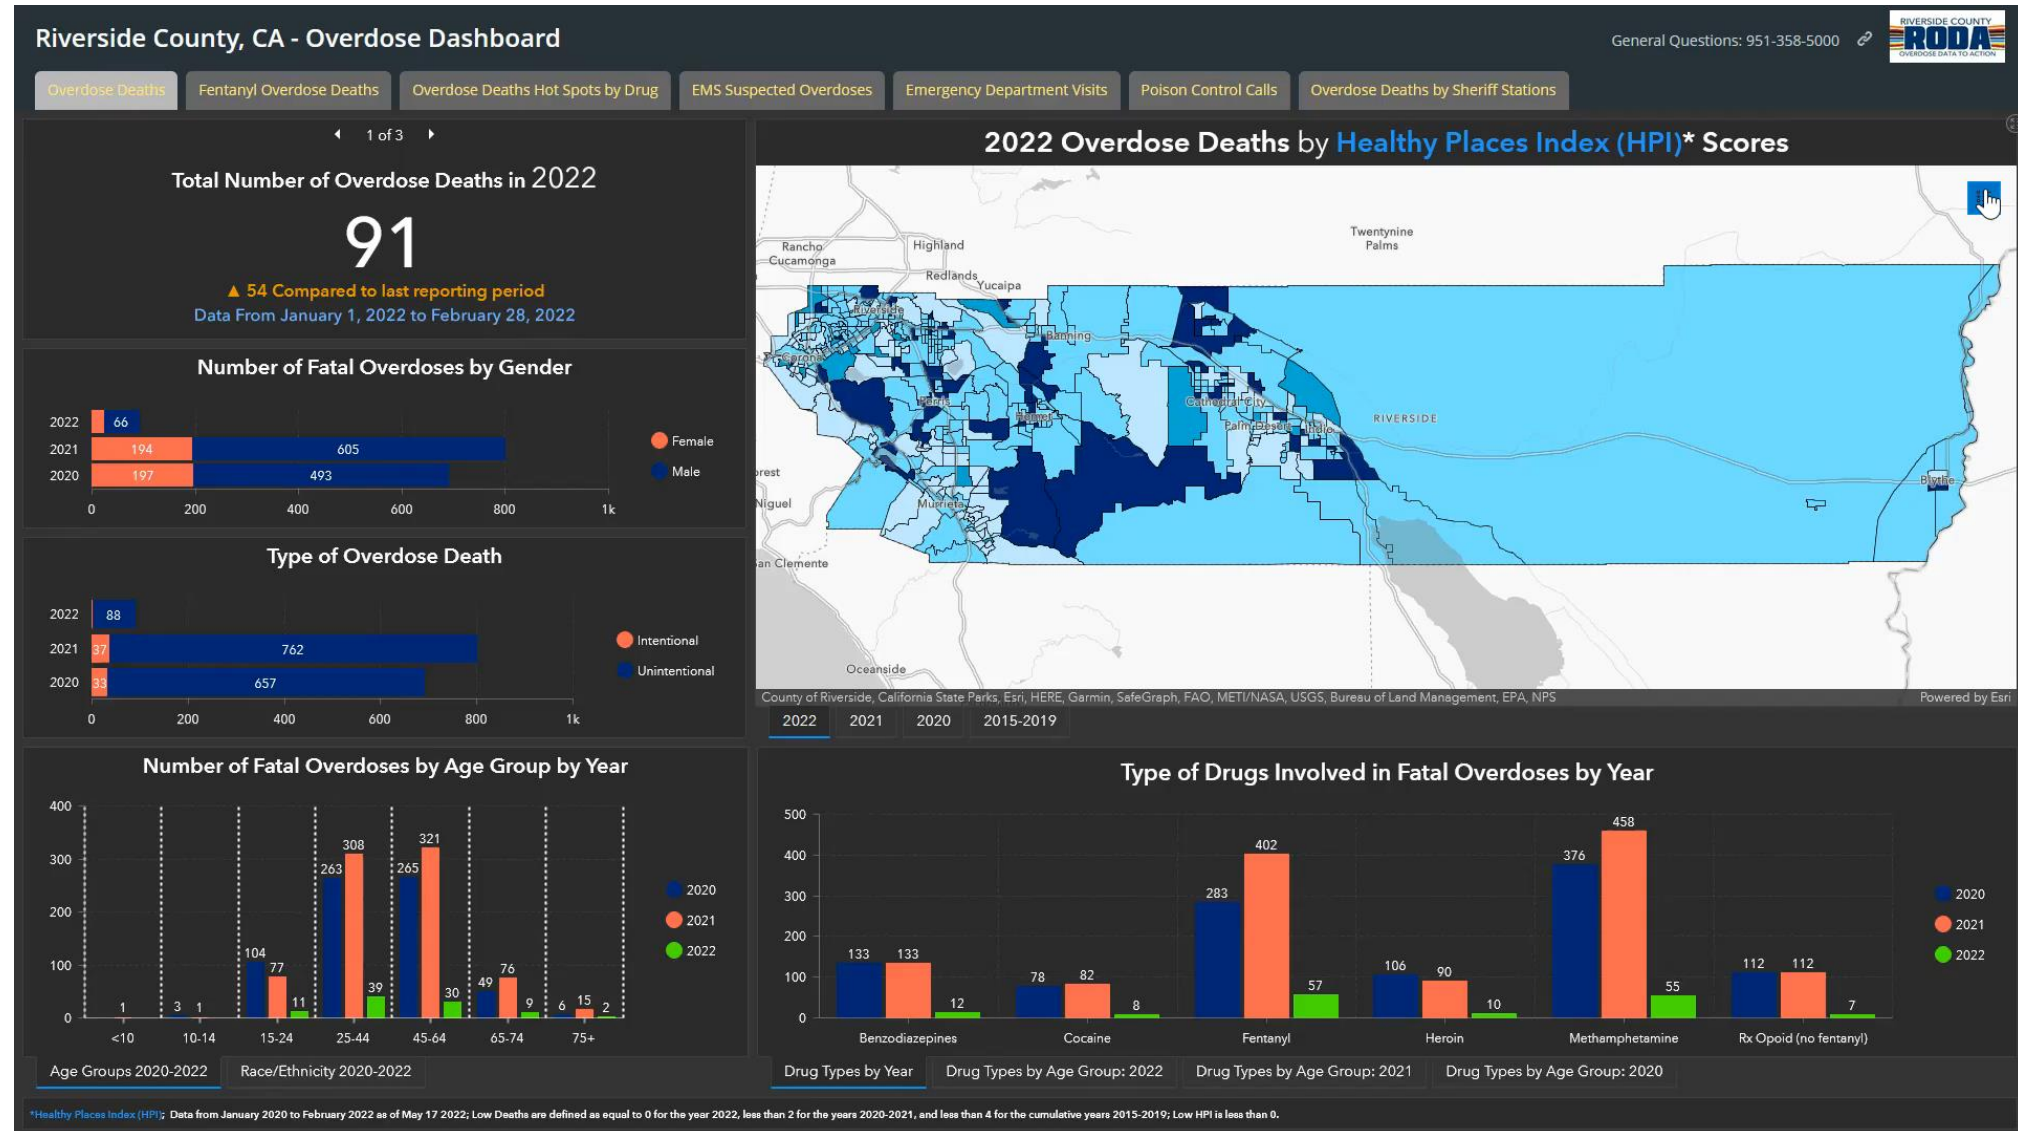

- The Riverside County - Overdose Data Dashboard uses data from HPI
- A one-stop shop for overdose related indicators and data
 - Increasing access to information for community members to improve tracking of opioid-related overdoses and better allocate resources
 - Providing an up-to-date picture of data collection operations
 - Providing a clear and concise overview of information collected in an understandable and accessible format
